

Instructions for editing a photo in Pixlr

1. Choose open image from Computer.

2. Select the crop tool. In the Constrain menu, choose "output size". Select 2200px for the width and 600px for the height.

3. Draw a 2200px by 600px box around the area you want to create an image. Hit enter.

4. This is the end result. Save photo and upload to your HOST eXpress site.
